Fără ambalare individuală în folie termocontractibilă

PS50 MAT

A close-up photograph of a dark, matte surface with a fine, uniform texture. The lighting is soft and even, highlighting the subtle grain of the material.

PS52 QUARTZ

A close-up photograph of a dark, matte surface with a fine, uniform texture, similar to PS50 MAT but with slightly different lighting or texture emphasis.

PS51 ALUTEX

A close-up photograph of a dark, matte surface with a fine, uniform texture, showing a slightly different grain or lighting effect compared to the other samples.

PS80 GLOSSY

A close-up photograph of a dark, glossy surface. The surface is highly reflective, showing clear highlights and reflections of the surrounding environment, including a glass object and red petals.

PANOURI DECORATIVE ANTISTROPIRE

INFO

Panoul decorativ antistropire este realizat din PAL, cu laminat decor pe o parte și laminat de echilibrare pe cealaltă parte.

Principalele caracteristici sunt rezistența la abraziune, impact și zgârieturi.

Acest produs este disponibil în aceleași decoruri și textură ca și blaturile de lucru.

DOMENIU DE UTILIZRE

BUCĂTĂRII

Panourile decorative antistropire sunt o alternativă decorativă* a plăcilor ceramice. În locul acestora, suprafața peretelui de lângă blat este acoperită cu panoul decorativ antistropire, rezultând o combinație armonioasă, atât vizual, cât și funcțional.

* Recomandat pentru plite electrice

DECO LAM

INFO

DECOLAM este colecția noastră de HPL sau Laminatul de Înaltă Presiune și reprezintă un tip de material decorativ care este utilizat pentru mobilă, blaturi de lucru și panouri decorative. Laminarea suprafețelor se realizează stratificarea hârtiei impregnată cu rășină presată la temperaturi înalte pentru a crea un material cât mai versatil și rezistent. Laminatul decorativ este preferat în detrimentul altor materiale datorită rezistenței la pete, zgârieturi și uzură.

Laminarea materialelor adaugă o strălucire și o profunzime vizuală, oferind un aspect elegant și estetic.

Aplicații de utilizare

Laminatul decorativ oferă o gamă largă de modele, culori și texturi, permițându-vă să redați aspectul și suprafața diferitelor materiale, precum lemnul, piatra sau metalul.

Acest produs este folosit la placarea panourilor complementare colecțiilor Vision, Technotop și Neotop pentru decorarea sau modernizarea locuințelor, cât și în industria ospitalității sau a birourilor.

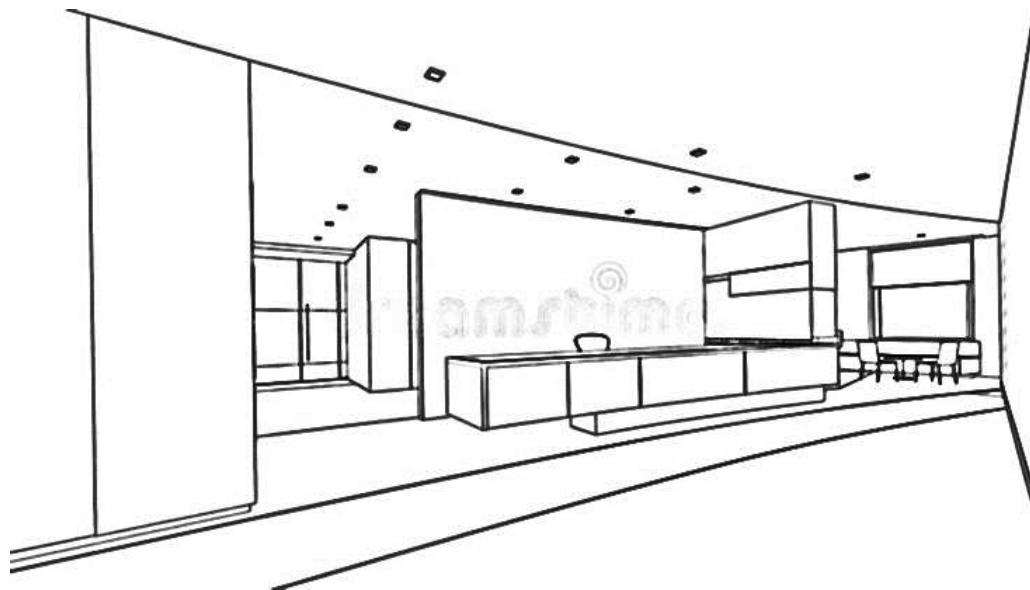

COLECȚIA CUPRINDE 220 DE DECORURI:

- 80 decoruri de blaturi (identice cu cele folosite în producția Technotop și Neotop) *
 - Format 4100 x 1400 mm,
 - Grosime: 0,5 – 0,7 mm
- 140 de decoruri din colecția de PAL melaminat.**
 - Format 3050 x 1300 mm
 - Grosime: 0,8 mm

VARIETATE DE DECORURI

- decoruri de lemn
- decoruri fantezie
- decoruri uni

DECO
LAM

/Disponibile în diverse structuri: mate, lucioase, de lemn sau piatră.*

În funcție de structura aleasă, grosimea laminatului variază între 0,5 – 0,8 mm.
